COPYRIGHT: (C)1996,JPO

(57) Abstract:

PURPOSE: To display whether setting is an initial value or not on an LED and a setting picture.

CONSTITUTION: This tuner is composed of a tuning demodulating part 1 for performing the tuning, amplification and FM demodulation of any desired satellite broadcasting channel from an IF signal, voice processing part 2 for demodulating the signal to a PCM signal, video signal processing part 3 for reproducing a source video signal, switching part 4 for video signals, deciding part 5 for deciding whether the present setting shows initial setting data or not, onscreen display part 6 for outputting the setting picture to display the input setting and the presence/absence of any change in set items, LED display part 7 for displaying the presence/absence of item changes for each channel, panel display part 8 for displaying the tuned channel and the set value, input setting part 9 for performing the key inputs of tuning and setting, storage part 10 for storing change presence/absence data for each channel or set item, memory part 11 for storing the initially set data and data set later, and control part 12 for controlling the respective parts.
